STUDENTS ADVOCATING FOR INCREASED DIVERSITY (SAID) IN STEM is a seminar series meant to educate the MIT community about the biases and stereotypes that create barriers for women and underrepresented minorities in STEM fields.

ALL SESSIONS WILL BE HELD IN THE PICOWER ROOM 3310 STARTING AT 5:30PM (WITH PIZZA)

Please contact mlemieux@mit.edu for sign up and questions.

Through group discussions, critical analysis of journal articles, and talks from successful women in science, our aim is to make students and faculty aware of the inequalities that exist in the workplace while also educating participants about biases and stereotypes directly impact behaviors and decrease opportunities for women and minorities to pursue STEM careers, especially positions of leadership.
